*RE: Application by Verizon New York Inc. for Authorization To Provide In-Region,  
InterLATA Services in State of Connecticut, Docket No. 01-100*

Dear Ms. Salas:

The attached was provided today to the CCB staff at their request in the above proceeding.  
Please let me know if you have any questions. The twenty-page limit does not apply as set forth  
in DA 01-1063.

Sincerely,

A handwritten signature in cursive script that reads "Dee May".

Re: Compliance Tariff Revision for Connecticut No. 11—Telephone Tariff

Dear Ms. Rickard:

Enclosed please find an original and four (4) copies of Verizon New York Inc.'s proposed revisions to State of Connecticut No. 11--Telephone Tariff. The following revisions will become effective May 30, 2001.

Connecticut No. 11—Telephone  
Section 5  
1st Revised Page 5  
1st Revised Page 7

This revision is made in compliance with the DPUC Decision of February 23, 2000 in Docket 99-05-30, Application of New York Telephone to Introduce Rates and Charges for Collocation for Certified Local Exchange Carriers, Order No. 1.

The proposed revisions, which mirror changes to Verizon's New York Interconnection tariff, are being made to be consistent with the current practice specified in FCC Docket 98-147, in order FCC No. 00-297 released August 10, 2000. With this filing, we are modifying the intervals to 10 calendar days from 10 business days for posting to the website those central offices with exhausted space for physical collocation and for a tour of such central offices after denial of a physical collocation request.

There is no revenue effect as a result of this filing.

Attached is a disk containing this filing in a Microsoft Word 97 file for the Department's use.

Very truly yours,

cc: Office of Consumer Counsel (2 copies)

NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)

5.1 Physical Collocation (Cont'd)

5.1.4 Joint Planning and Implementation Intervals (Cont'd)

(D) (Cont'd)

The Telephone Company and the CLECs shall work cooperatively in meeting these milestones and deliverables as determined during the joint planning process. A preliminary schedule will be developed outlining major milestones. In Physical Collocation, the CLEC and the Telephone Company control various interim milestones they must meet to meet the overall intervals. The interval clock will stop, and the final due date will be adjusted accordingly, for each milestone the CLEC misses (day for day). When the Telephone Company becomes aware of the possibility of vendor delays, it will first contact the CLEC(s) involved to attempt to negotiate a new interval. If the Telephone Company and the CLEC cannot agree, the dispute will be submitted to the Director of the Communications Division of the DPUC for prompt resolution. The Telephone Company and the CLEC shall conduct additional joint planning meetings, as reasonably required, to ensure all known issues are discussed and to address any that may impact the implementation process.

(E) Prior to the CLEC beginning the installation of its equipment, the CLEC must sign the Telephone Company work completion notice, indicating acceptance of the multiplexing node construction work and providing the Telephone Company with a security fee, if required, as set forth in Section 5.5.5 following. Payment is due within thirty (30) days of bill date. The CLEC may not install any equipment or facilities in the multiplexing node(s) until after the receipt by the Telephone Company of the Telephone Company work completion notice and any applicable security fee.

(F) Occupancy for all spaces will be granted upon completion of the multiplexing node construction work. Occupancy fees shall commence either upon occupancy by the CLEC or thirty (30) days after written notice from the Telephone Company.

5.1.5 Space Limitations

(A) When No Space Is Available For Physical Collocation

(1) The Telephone Company will inform the Commission as soon as it determines it will be unable to fulfill a request, based on applications, six (6) month forecasts as described in 5.5.1 following, or as soon as it otherwise becomes aware that there is no further space available for physical collocation.

(2) The Telephone Company will post a list on its Website of all central offices that have been identified as having no space for Physical Collocation and update the list within ten (10) calendar days of the date at which a central office runs out of physical collocation space.

(C)

NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)

5.1 Physical Collocation (Cont'd)

5.1.5 Space Limitations (Cont'd)

(D) Verification of Space Limitations

- (1) When sufficient space is not available to accommodate a Physical Collocation request at a Telephone Company central office, the Telephone Company will, within an additional ten (10) calendar days of denying a request, allow CLECs to tour the Telephone Company central office where sufficient space is not available upon signing a confidentiality agreement. Where requests from multiple CLECs are derived for the same Telephone Company central office, the Telephone Company may coordinate tours of the Telephone Company central offices with the CLECs and Commission Staff. Such tour will not be restricted to the room in which space was denied but may include the entire central office. (C)
- In addition, the Telephone Company will provide the Commission Staff with floor plans, future use information, etc. as requested by the Commission Staff.
- (2) If a Telephone Company central office has been deemed by the Commission to be space exempt due to space exhaustion, no further tours will be given unless conditions affecting space availability have changed (e.g., equipment removal) unless requested by the Commission.
- (3) The Telephone Company will provide an escort who will be able to answer questions regarding present and future use of space, and will provide construction plans for empty space upon Commission Staff request.

(E) Removal of Obsolete Equipment

- (1) Upon reasonable request of a CLEC or upon the order of the Commission, the Telephone Company will remove obsolete unused equipment.
- (1) The Telephone Company will review requests to remove equipment on a case-by-case basis and will be responsible to prove to the Commission that equipment is not used or obsolete.

Re: Compliance Tariff Revision for Connecticut No. 11—Telephone Tariff

Dear Ms. Rickard:

Enclosed please find an original and four (4) copies of Verizon New York Inc.'s revised tariff pages, as shown on the attachment to this letter, in the State of Connecticut No. 11--Telephone Tariff, to become effective May 31, 2001.

This revision is made in compliance with the DPUC Decision of February 23, 2000 in Docket 99-05-30, Application of New York Telephone to Introduce Rates and Charges for Collocation for Certified Local Exchange Carriers, Order No. 1.

The proposed revisions, which mirror changes to Verizon's New York Interconnection tariff, modify the collocation regulations to specify that annually each CLEC must submit a written statement signed by a responsible officer attesting that it is not exceeding the total number of load amps the CLEC ordered from the Company.

The proposed revisions also specify that the CLECs will be assessed a miscellaneous collocation power service charge if the Telephone Company is required to perform any work associated with a CLEC's request for reduced DC power.

There is no revenue effect as a result of this filing.

Attached is a disk containing this filing in a Microsoft Word 97 file for the Department's use.

Very truly yours,

cc: Office of Consumer Counsel (2 copies)

NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)

5.1 Physical Collocation (Cont'd)

5.1.1 Service Description (Cont'd)

- (D) In addition to the floor space and transmitter/receiver space, the Telephone Company will provide -48V DC power, battery and generator back-up power, AC convenience outlet, heat, air conditioning and other environmental support to the CLEC telecommunications equipment in the same manner that it provides such support items to its own transmission equipment within that central office. Standard -48V DC power shall be provided in one (1) amp increments.
- (1) The Telephone Company will provide DC power to the Collocation arrangement as specified by the CLEC in its Collocation application. The CLEC will specify the load on each feed and the size of the fuse to be placed on each feed. Charges for DC power will be applied per load amp based on the total number of load amps ordered. For example, if a CLEC orders a total of 40 load amps of DC power and an A and B feed, the CLEC could order 20 load amps on the A feed, and 20 load amps on the B feed. The Telephone Company will permit the CLEC to order a fuse size at up to 2.5 times the load amps ordered. Thus, the CLEC could order that each feed be fused at 50 amps if the CLEC wants one feed to carry the entire load in the event the other feed fails. Accordingly, the CLEC will be charged on the basis of the total number of load amps ordered, i.e., 40 amps, and not based on the total number of amps available for the fuse size ordered.
- (E) The CLEC is responsible for procuring, installing and maintaining all cables from manhole "0" to the Telephone Company Point of Termination, including fiber optic feeder cable into the Central Office Cable Vault, fire retardant riser cable between the Cable Vault and the multiplexing node and all cables from the multiplexing node to the Point of Termination or between multiplexing nodes established by the same CLEC. The CLEC will also be responsible for installing and maintaining the splice in the Cable Vault, or Alternate Splice Area (ASA), as designated by the Telephone Company. Alternatively, the CLEC may purchase unbundled transport from the Telephone Company as described in State of Connecticut No. 12—Telephone Tariff, Section 5.3 or from another CLEC.
- (F) The CLEC's facilities shall not physically, electronically, or inductively interfere with the Telephone Company's or other CLEC's facilities and must comply with the Technical Specifications set forth in Sections 5.1.16 and 5.3.6 following.
- (G) The CLEC does not receive, as a result of entering into a Collocation arrangement hereunder, any right, title or interest in the Telephone Company's central office facility, the multiplexing node, multiplexing node enclosure, cable space, cable racking, vault space or conduit space other than as expressly provided herein.

## NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)5.1 Physical Collocation (Cont'd)5.1.9 Security Measures (Cont'd)

- (I) In the event of work stoppages, separate entrances will be established for the CLEC, where possible. When separate entrances are not available, the Telephone Company will provide CLEC employees the same access that it provides to its management employees. Failure to provide such separate entrances shall not render the Telephone Company liable for any claim for damages.
- (J) The CLEC agrees that its employees/vendors with access to Telephone Company central office(s) shall at all times adhere to the rules of conduct established by the Telephone Company for the central office and the Telephone Company's personnel and vendors. The Telephone Company reserves the right to make changes to such procedures and rules to preserve the integrity and operation of the Telephone Company's network or facilities or to comply with applicable laws and regulations. The Telephone Company will provide the CLEC with written notice of such changes.

5.1.10 Repair and Maintenance

- (A) The CLEC will be responsible for notifying the Telephone Company of significant outages which could impact or degrade the Telephone Company's switches and services, and provide estimated clearing time for restoral.
- (B) The CLEC is responsible for coordinating with the Telephone Company to ensure that services are installed in accordance with the service request. Before beginning any delivery, installation, replacement or removal work for equipment and/or facilities located within the CLEC's multiplexing node, the CLEC must obtain the Telephone Company's written approval of the CLEC's proposed scheduling of the work in order to coordinate use of temporary staging areas and other building facilities. The Telephone Company may request additional information before granting approval such as NEBS Compliance documentation, and may require scheduling changes. Such approval will not be unreasonably withheld.
- (C) The CLEC is responsible for testing, if necessary, with the Telephone Company to identify and clear a trouble when the trouble has been sectionalized (isolated) to a CLEC provided service. The CLEC is responsible for providing trouble report status when requested.
- (D) The CLEC must pay a CLEC Not Ready charge as set forth in Section 10.5.1(C)(3) (T) following whenever the Telephone Company personnel are required to identify a trouble as being on the CLEC's side of the point of termination (e.g., in the connection cabling or associated cross connection, or CLEC antenna and associated microwave equipment).

NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)

5.1 Physical Collocation (Cont'd)

5.1.15 Inspections by the Telephone Company (Cont'd)

- (B) The Telephone Company has the right to inspect the completed installation of the CLEC's equipment and facilities. In addition, the Telephone Company may conduct up to twelve (12) routine inspections per year of all or portions of the CLEC's facilities, to determine that occupancies are authorized and installed and maintained in conformance with the required standards. The Telephone Company will provide the CLEC with fifteen (15) days advance notice of non-emergency inspections and the CLEC shall have the right to be present at the time of inspection. The Telephone Company will notify the CLEC in writing of any outside agency inspection unless the Telephone Company is not notified in time; in such cases the Telephone Company will notify the CLEC as soon as reasonably possible. The CLEC shall have the right to be present at the time of inspection by the outside agency unless the Telephone Company is not notified in advance of such inspections. The CLEC will be charged for such inspections if the Telephone Company finds a violation of these terms and conditions.

(C) Scheduled Attestations

- (1) Annually, the CLEC must submit a written statement signed by a responsible officer of the company, which attests that it is not exceeding the total load of power as ordered on the Collocation application. This attestation, which must be received by the Telephone Company no later than the last day of June, shall individually list all of the CLEC's completed Collocation arrangements provided by the Telephone Company in Connecticut. If the CLEC fails to submit this written statement by the last day in June, the Telephone Company will notify the CLEC in writing that it has 30 days to submit its power attestation. Failure to submit the required statement within the 30 day notice period will result in the billing of DC power at each Collocation arrangement to be increased to the total number of amps fused.

(N)

NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)

5.1 Physical Collocation (Cont'd)

5.1.16 Technical Specifications

- (A) CLEC equipment must fully comply with Bellcore Network Equipment Building Systems (NEBS) Generic Equipment Requirements (GR-63-CORE), Electromagnetic Compatibility and Electrical Safety Generic Criteria for Network Telecommunication Equipment (GR-1089-CORE) and the Network Equipment Installation Standards Information Publication (IP-72201), Workmanship Requirement Profile and the Telephone Company's central office, engineering, environmental and transmission standards as they relate to fire, safety, health, environmental safeguards, or interference with the Telephone Company's services or facilities.
- (B) CLEC equipment must conform to the same specific risk/safety/hazard standards which the Telephone Company imposes on its own central office equipment as defined in the Telephone Company's NEBS requirements RNSA-NEB-95-003, Revision 8 or higher. CLEC equipment is not required to meet the same performance and reliability standards as the Telephone Company imposes on its own equipment as defined in the Telephone Company's RNSA-NEB-95-003, Revision 8 or higher.
- (C) In addition, the CLEC may install equipment that has been deployed by the Telephone Company for five (5) years or more with a proven safety record.

---

NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)

5.1 Physical Collocation (Cont'd)

5.1.17 Rates and Charges (Cont'd)

(B) Monthly Rates (Cont'd)

- (5) The Cable Rack rate as set forth in Section 10.5.1(B)(5) following, is assessed per fiber optic cable.
- (6) The SAC POT Bay Termination rate as set forth in Section 10.5.1(B)(6) following, applies for the connection of the Telephone Company POT Bay to the Telephone Company equipment location(s). It is assessed upon installation of the terminations. This rate only applies when the Telephone Company provides the POT Bay as described in Section 5.1.7(B)(1) preceding. For Line Sharing arrangements, two (2) terminations will apply per line.
- (7) The SAC Cable and Frame Termination rate as set forth in Section 10.5.1(B)(7) following, applies for the connection of the Telephone Company cable and frame terminations. It is assessed upon the installation of the terminations and associated cabling. Terminations will connect to a Digital Cross Connect System as determined by the Telephone Company. For Line Sharing arrangements, two (2) terminations will apply per line.
- (8) The POT Bay Frame rate as set forth in Section 10.5.1(B)(8) following, applies per Bay installed in the common area of the collocation room.
- (9) The Entrance Fiber Structure rate as set forth in Section 10.5.1(B)(9) following, applies to the CLEC fiber optic cable that is placed between the Telephone Company's cable vault entrance manhole (manhole "0") and the cable vault. The rate is assessed per foot, per innerduct.
- (10) The Splitter Support rate as set forth in Section 10.5.1(B)(10) following, applies per shelf. This rate only applies for Splitter Arrangement Option C.
- (11) The Maintenance of Splitter Equipment rate as set forth in Section 10.5.1(B)(11) following, applies per shelf. This rate only applies for Splitter Arrangement Option C.

## NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)5.1 Physical Collocation (Cont'd)5.1.17 Rates and Charges (Cont'd)(C) Other Charges

- (1) The Escort Service charge as set forth in Section 10.5.1(C)(1) following, is a nonrecurring charge that applies when a CLEC requires escorted access to the Telephone Company premises that is outside the secured access to the multiplexing node. (T)
- (2) Whenever the Telephone Company is required to perform work on a Collocation arrangement as a result of a CLEC's order for a reduction in power requirements (e.g., change in fuse size), the Telephone Company will assess a Miscellaneous Collocation Power Service charge as set forth in Section 10.5.1(C)(2) following. The charge applies for the first quarter hour (or fraction thereof) and each additional quarter hour (or fraction thereof) per technician, per occurrence. The charge is the same as that specified for escort under Section 10.5.1(C)(1) following of this tariff. If a CLEC orders a power reduction prior to June 30, 2001, where only a change in the fuse size is necessary, the Telephone Company will waive this charge. ]
- (3) If the CLEC orders a change in the power configuration requiring new -48V DC power feeds to the Collocation arrangement, the Engineering and Implementation Power Augment Only charge applies as set forth in Section 5.1.17(A)(3) preceding. In addition, if a CLEC's order for a reduction in DC power triggers the deployment of power cabling to a different distribution point, the Engineering and Implementation Power Augment only charge applies. The Telephone Company will work cooperatively with the CLEC to configure the new power distribution cables and disconnect the old ones. (N)
- (4) The CLEC Not Ready charge as set forth in Section 10.5.1(C)(1) following is a nonrecurring charge that applies as described in Section 5.1.10(D) preceding. ]

Effective: May 31, 2001

By Sandra Dilorio Thorn, General Counsel  
1095 Avenue of the Americas, New York, N.Y. 10036

## NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)5.2 Virtual Collocation (Cont'd)5.2.10 Rates and Charges (Cont'd)(B) Monthly Rates (Cont'd)

- (5) The Land and Buildings rate as set forth in Section 10.5.2(B)(5) following, provides for floor space needed to support equipment, racking and/or spare cabinets. It is assessed per 1/4 rack or fraction thereof. The cabinet should be provided by the CLEC per the Telephone Company's specification. The amount of spare plug-ins/cards required will be based on the manufacturer's recommended amount, unless otherwise mutually agreed by the Telephone Company and the CLEC.
- (6) A Relay Rack rate as set forth in Section 10.5.2(B)(6) following, applies for the support of the Virtual Collocation equipment. It is assessed per 1/4 rack or fraction thereof.
- (7) A Splitter Support rate as set forth in Section 10.5.2(B)(7) following, applies per shelf. This rate only applies for splitters deployed in a separate relay rack as part of the Virtual Collocation arrangement.
- (8) The Maintenance of Splitter Equipment rate as set forth in Section 10.5.2(B)(8) following, applies per shelf.

(C) Other Charges

The following are other miscellaneous charges that will be applied on a per occurrence basis.

- (1) Training Charges as set forth in Section 10.5.2(C)(1) following, will be assessed for training the Telephone Company's technicians to service CLEC specified equipment not used by the Telephone Company in the specified central office. Charges will cover all costs incurred by the Telephone Company and the technicians, including training fees, materials, airfare, lodging, meals and technician work time as loaded salary costs for lost productivity.
- (2) Maintenance activity (trouble in the equipment) is to be tested, isolated and evaluated by the CLEC. Telephone Company technicians will perform the instructed activities on the equipment as specifically directed by the CLEC. The technician's time spent servicing the Virtual Collocation arrangement at the CLEC's direction will be billed to the CLEC per occurrence as set forth in Section 10.5.2(C)(2) following.

## NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)5.2 Virtual Collocation (Cont'd)5.2.10 Rates and Charges (Cont'd)(C) Other Charges (Cont'd)

- (3) Whenever work is performed on a Virtual Collocation arrangement that is not a part of implementing or provisioning a standard Virtual Collocation arrangement, the Equipment Service Charge will apply as specified in Section 10.5.2(C) following. Examples where the Equipment Service Charge will apply include, but are not limited to, additional testing or turn-up requirements, software upgrades and inspector services.
- (4) When the CLEC requests access to their Telephone Company Virtual Collocation arrangement, a Telephone Company designated escort will be required at all times. The Equipment Service Charge as specified in Section 10.5.2(C) following will apply.
- (5) Whenever the Telephone Company is required to perform work on a Collocation arrangement as a result of a CLEC's order for a reduction in power requirements (e.g., change in fuse size), the Telephone Company will assess a Miscellaneous Collocation Power Service charge as set forth in Section 10.5.1(C)(2) following. The charge applies for the first quarter hour (or fraction thereof) and each additional quarter hour (or fraction thereof) per technician, per occurrence. The charge is the same as that specified for escort under Section 10.5.1(C)(1) following of this tariff. If a CLEC orders a power reduction prior to June 30, 2001, where only a change in the fuse size is necessary, the Telephone Company will waive this charge. ]
- (6) If the CLEC orders a change in the power configuration requiring new -48V DC power feeds to the Collocation arrangement, the Engineering and Implementation Power Augment Only charge applies as set forth in Section 5.1.17(A)(3) preceding. In addition, if a CLEC's order for a reduction in DC power triggers the deployment of power cabling to a different distribution point, the Engineering and Implementation Power Augment only charge applies. The Telephone Company will work cooperatively with the CLEC to configure the new power distribution cables and disconnect the old ones. ]

5.6.2 Assembly Products

(A) Service Description

The Assembly Products provide alternatives to Physical and Virtual Collocation for the purposes of facilitating a CLEC's ability to combine unbundled loop(s) and line port(s). Unbundled loop(s) and line port(s) are provided as set forth in Section 5 of the State of Connecticut No. 12--Telephone Tariff. The Assembly Products are offered in three different arrangements:

- Assembly Room
- Assembly Point - Outside the Central Office (Wall Mount)
- Assembly Point - Outside the Central Office (Pad Mount)

NETWORK INTERCONNECTION SERVICES

5. Collocation (Cont'd)

5.6 Collocation Alternatives (Cont'd)

5.6.2 Assembly Products (Cont'd)

(B) Assembly Room Arrangement

- (1) The Assembly Room is a non-conditioned secured room within the Telephone Company's central office. The CLEC can access the Assembly Room to perform loop and line port combinations on a CLEC Termination Frame ("CTF"). The CLEC, at its option, may install a prewired terminal block for purposes of connecting to the Telephone Company's unbundled loop(s) and line port(s). In this case, the CLEC must contract with a Telephone Company approved vendor and the terminal block must conform to the standard and type as established for the CTF by the Telephone Company. The environmental properties normally associated with central office conditioned transmission equipment space are not provided in an Assembly Room arrangement.
- (2) The Assembly Room is subject to availability of space and facilities in each central office on a first come, first served basis.
- (3) The CLEC may not install any equipment within the Assembly Room arrangement. The CLEC may utilize portable test equipment for the purposes of testing unbundled loop(s) and line port(s), but may not store this equipment in the Assembly Room.
- (4) The Telephone Company will provide general overhead lighting and AC convenience outlets for the shared use of all CLECs in the Assembly Room. The Assembly Room will not be provisioned with -48V DC power.

5.8 Cageless Collocation - Open Environment (CCOE) (Cont'd)

5.8.8 Rates and Charges (Cont'd)

(B) Monthly Rates

- (1) The Land and Building rate as set forth in Section 10.5.6(B)(1) following, is associated with the footprint of the equipment bay. The rate is assessed per equipment bay.
- (2) The DC Power rate will apply as described in Section 5.1.17(B)(3) preceding, and the rates are set forth in Section 10.5.6(B)(2) following.
- (3) The HVAC rate will apply as described in Section 5.1.17(B)(4) preceding, and the rates are set forth in Section 10.5.6(B)(3) following.
- (4) The Cable Rack rate will apply as described in Section 5.1.17(B)(5) preceding, and the charges are set forth in Section 10.5.6(B)(4) following.
- (5) The SAC SPOT Bay Termination as set forth in Section 10.5.6(B)(5) following, applies for the connection of the SPOT Bay frame to the Telephone Company's frame. It is assessed upon installation of the terminations. This rate only applies when the Telephone Company provides the SPOT Bay as described in Section 5.8.5 preceding.
- (6) The SAC Cable and Frame Termination as set forth in Section 10.5.6(B)(6) following, applies for the connection of the Telephone Company cables and frame terminations. It is assessed upon installation of the terminations and associated cabling. Terminations will connect to a Digital Cross Connect System as determined by the Telephone Company only in the event that it is the only option available in a particular central office as determined by the Telephone Company.
- (7) The SPOT Bay Frame Termination as set forth in Section 10.5.6(B)(7) following, is comprised of the cost of providing space and the equipment terminations to be mounted in the CCOE area. This rate only applies when the Telephone Company provides the SPOT Bay as described in Section 5.8.5 preceding.
- (8) The Entrance Fiber Structure rate will apply as described in Section 5.1.17(B)(9) preceding, and the charges are set forth in Section 10.5.6(B)(8) following.
- (9) The Cageless Security rate as set forth in Section 10.5.6(B)(9) following, is assessed per equipment bay.

(C) Other Charges
